

Documents

- 1) Godfrey, O.C., Adindu, E.A., Edet, U.O., Mbim, E.N., Eze, G.C., Asogwa, F.C., Benjamin, I., C H.

Unraveling the inhibitory potential of fatty acids from *Cola lepidota* seed against mono fragment (9F8) (3VG0) leptin antagonism and restoration of ‘satiety’ in obesity condition: chemical analysis, pharmacokinetics, and molecular docking
(2024) *Zeitschrift fur Physikalische Chemie*, 238 (4), pp. 763-796.

- 2) Gomatam, A., Joseph, B., Advani, P., Shaikh, M., Iyer, K., Coutinho, E.

How effective are ionization state-based QSPKR models at predicting pharmacokinetic
(2023) *Molecular Diversity*, 27 (4), pp. 1675-1687.

- 3) Khan, A., Iqbal, A., Ahmed, S., Manzoor, N., Siddiqui, T.

Synthesis, Anti-Fungal Potency and In silico Studies of Novel Steroidal 1,4-Dihydropyr
(2023) *Chemistry and Biodiversity*, 20 (5), art. no. e202300096, .

- 4) Stoyanova, R., Katzberger, P.M., Komissarov, L., Khadhraoui, A., Sach-Peltason, L., Groebke Manevski, N.

Computational Predictions of Nonclinical Pharmacokinetics at the Drug Design Stage
(2023) *Journal of Chemical Information and Modeling*, 63 (2), pp. 442-458.

- 5) Nisar, H., Wajid, B., Anwar, F., Ahmad, A., Javaid, A., Attique, S.A., Nisar, W., Saeed, A., Shal

Bioinformatics and systems biology analysis revealed PMID26394986-Compound-10 as drug against covid-19
(2023) *Journal of Biomolecular Structure and Dynamics*, .

- 6) Nishinarizki, V., Hardianto, A., Gaffar, S., Muchtaridi, M., Herlina, T.

Virtual screening campaigns and ADMET evaluation to unlock the potency of flavonoid

SARS-COV-2 inhibitors

(2023) *Journal of Applied Pharmaceutical Science*, 13 (2), pp. 78-88.

- 7) Auberson, Y.P., Lièvre, A., Desrayaud, S., Briard, E.

A practical approach to the optimization of positron emission tomography imaging age system

(2022) *Journal of Labelled Compounds and Radiopharmaceuticals*, 65 (13), pp. 343-350.

- 8) Faqueti, L.G., da Silva, L.A.L., Moreira, G.S.G., Kraus, S., de Jesus, G.S.C., Honorato, L.A., A.R.S., Costa, T.D., Biavatti, M.W.

Preclinical Pharmacokinetic and Pharmacodynamic Investigation of 5'-Methoxynobilet conyzoides: In vivo and In silico Approaches

(2022) *Pharmaceutical Research*, 39 (9), pp. 2135-2145.

- 9) Bucao, X.E.N., Solidum, J.N.

In Silico Evaluation of Antidiabetic Activity and ADMET Prediction of Compounds from

(2022) *Philippine Journal of Science*, 151 (1), pp. 171-192.

- 10) Danishuddin, Kumar, V., Faheem, M., Woo Lee, K.

A decade of machine learning-based predictive models for human pharmacokinetics:

(2022) *Drug Discovery Today*, 27 (2), pp. 529-537.

- 11) El-Sayed, N.N.E., Al-Otaibi, T.M., Alonazi, M., Masand, V.H., Barakat, A., Almarhoon, Z.M., E

Synthesis and Characterization of Some New Quinoxalin-2(1H)one and 2-Methyl-3H-q Targeting the Onset and Progression of CRC with SAR, Molecular Docking, and ADME

(2021) *Molecules*, 26 (11), art. no. 3121, .

- 12) Cottura, N., Howarth, A., Rajoli, R.K.R., Siccardi, M.

The Current Landscape of Novel Formulations and the Role of Mathematical Modeling

(2020) *Journal of Clinical Pharmacology*, 60 (S1), pp. S77-S97.

- 13) Pandey, S.K., Ojha, P.K., Roy, K.

Exploring QSAR models for assessment of acute fish toxicity of environmental transf

pesticides (ETPPs)

(2020) *Chemosphere*, 252, art. no. 126508, .

- 14) Tsanaktsidou, E., Karavasili, C., Zacharis, C.K., Fatouros, D.G., Markopoulou, C.K.

Partial least square model (PLS) as a tool to predict the diffusion of steroids across a
(2020) *Molecules*, 25 (6), art. no. 1387, .

- 15) Wang, Y., Liu, H., Fan, Y., Chen, X., Yang, Y., Zhu, L., Zhao, J., Chen, Y., Zhang, Y.

In Silico Prediction of Human Intravenous Pharmacokinetic Parameters with Improved
(2019) *Journal of Chemical Information and Modeling*, 59 (9), pp. 3968-3980.

- 16) Jin, P., Song, Y., Yu, G.

The role of abnormal methylation of WNT5a gene promoter regions in human epithelial cells
and experimental study
(2018) *Analytical Cellular Pathology*, 2018, art. no. 6567081, .

- 17) Zhivkova, Z.

Quantitative Structure – Pharmacokinetic Relationships for Plasma Clearance of Basic Drugs
the Major Elimination Pathway
(2017) *Journal of Pharmacy and Pharmaceutical Sciences*, 20, pp. 135-147.

- 18) Zhivkova, Z.

Quantitative Structure – Pharmacokinetics Relationships for Plasma Protein Binding of Basic Drugs
(2017) *Journal of Pharmacy and Pharmaceutical Sciences*, 20, pp. 349-359.
