

Documents

- 1) Cárdenas, C., Villaveces, J.L., Bohórquez, H., Llanos, E., Suárez, C., Obregón, M., Patarroyo

Quantum chemical analysis explains hemagglutinin peptide-MHC Class II molecule HL
(2004) *Biochemical and Biophysical Research Communications*, 323 (4), pp. 1265-1277.

- 2) Reche, P.A., Glutting, J.-P., Zhang, H., Reinherz, E.L.

Enhancement to the RANKPEP resource for the prediction of peptide binding to MHC r
(2004) *Immunogenetics*, 56 (6), pp. 405-419.

- 3) Srinivasan, K.N., Brusic, V., August, T.J.

New technologies for vaccine development
(2004) *Drug Development Research*, 62 (4), pp. 383-392.

- 4) Cui, D., Jin, G., Gao, T., Sun, T., Tian, F., Gomez Estrada, G., Gao, H., Sarai, A.

Characterization of BRCAA1 and its novel antigen epitope identification
(2004) *Cancer Epidemiology Biomarkers and Prevention*, 13 (7), pp. 1136-1145.

- 5) Li, L., Bouvier, M.

Structures of HLA-A*1101 Complexed with Immunodominant Nonamer and Decamer H
the Presence of a Middle, Secondary Anchor Residue
(2004) *Journal of Immunology*, 172 (10), pp. 6175-6184.

- 6) Srinivasan, K.N., Zhang, G.L., Khan, A.M., August, J.T., Brusic, V.

Prediction of class I T-cell epitopes: Evidence of presence of immunological hot spots
(2004) *Bioinformatics*, 20 (SUPPL. 1), pp. i297-i302.

7) Flower, D.R.

Towards in silico prediction of immunogenic epitopes

(2003) *Trends in Immunology*, 24 (12), pp. 667-674.
