

Documents

- 1) Lan, H., Wang, Y., Liu, W., Dong, X., Sun, Y.

Composite of KLVFF-Transthyretin-Penetratin and Manganese Dioxide Nanoclusters: A against Alzheimer's β -Amyloid Fibrillogenesis

(2024) *Molecules*, 29 (6), art. no. 1405, .

- 2) Moghimi-Khorasgani, A., Moghadam, F.H., Nasr-Esfahani, M.H.

Ferulic Acid reduces amyloid beta mediated neuroinflammation through modulation of microglial cells

(2023) *PLoS ONE*, 18 (8 August), art. no. e0290249, .

- 3) Xiang, L., Wang, Y., Liu, S., Liu, B., Jin, X., Cao, X.

Targeting Protein Aggregates with Natural Products: An Optional Strategy for Neurode

(2023) *International Journal of Molecular Sciences*, 24 (14), art. no. 11275, .

- 4) Ververis, A., Ioannou, K., Kyriakou, S., Violaki, N., Panayiotidis, M.I., Plioukas, M., Christodou

Sideritis scardica Extracts Demonstrate Neuroprotective Activity against A β 25–35 Toxi

(2023) *Plants*, 12 (8), art. no. 1716, .

- 5) Liu, X., Yu, C., Yao, Y., Lai, H., Ye, X., Xu, J., Guo, J., Xiao, X., Lin, C., Huang, Z., Lin, J., Yu,

Novel neuroprotective pyromeconic acid derivatives with concurrent anti-A β depositio anti-oxidation properties for treatment of Alzheimer's disease

(2023) *European Journal of Medicinal Chemistry*, 248, art. no. 115120, .

- 6) Hsu, K.-Y., Ho, C.-T., Pan, M.-H.

The therapeutic potential of curcumin and its related substances in turmeric: From raw application strategies

(2023) *Journal of Food and Drug Analysis*, 31 (2), art. no. 1, pp. 194-211.

7) Lv, H., Wang, Y., Yang, X., Ling, G., Zhang, P.

Application of curcumin nanoformulations in Alzheimer's disease: prevention, diagnosis
(2023) *Nutritional Neuroscience*, 26 (8), pp. 727-742.

8) Dehabadi, M.H., Caflisch, A., Ilie, I.M., Firouzi, R.

Interactions of Curcumin's Degradation Products with the A β 42Dimer: A Computational Study
(2022) *Journal of Physical Chemistry B*, 126 (39), pp. 7627-7637.

9) Hwang, H.-J., Lee, S.R., Yoon, J.-G., Moon, H.-R., Zhang, J., Park, E., Yoon, S.-I., Cho, J.A.

Ferulic Acid as a Protective Antioxidant of Human Intestinal Epithelial Cells
(2022) *Antioxidants*, 11 (8), art. no. 1448, .

10) Radwan, A., Alanazi, F.

Combined Modeling Study of the Binding Characteristics of Natural Compounds, Derivatives of β -Amyloid Peptide Monomer
(2022) *International Journal of Molecular Sciences*, 23 (7), art. no. 3546, .

11) Kotormán, M., Bohács, I., Erdenebileg, K.

The anti-amyloidogenic effect of hydroxypropyl- β -cyclodextrin and trans-ferulic acid
(2022) *Current Topics in Peptide and Protein Research*, 23, pp. 107-111.
